

Do You Want to March With the TAC? Think!

Pharmaceutical Multinationals

The Pharmaceutical industry is not a health industry - but an investment industry.

- It is conducting the largest fraud in the history of mankind by deceptively promising health.
- But its multi-trillion dollar investment business only exists as long as diseases exist and spread.
- It is the worst form of corporate colonialism built on the suffering and deaths of millions of people.
- The money the British Glaxo (GSK) multinational - the maker of the AIDS drug AZT - has taken from this fraud scheme is more than the economies of the 40 poorest countries in Africa combined!

This multi-trillion dollar investment business is controlled by a handful of investors around the **J.P. Morgan** financial group (UK) and the **Rockefeller** financial group (USA).

The Goal of the International Pharmaceutical Cartel and their Foreign Political Stake Holders

Official TAC financial records show that **The Rockefeller Foundation** and other Front Organizations of the Pharmaceutical Cartel have donated millions of rands to the TAC

TAC

Economic Drain and Political Destabilization of South African Democracy

AZT used in laboratory research carries this deadly poison warning

Ultimate consequence of this fraud:

The TAC demands that the South African government buy AIDS drugs that do not cure but actually make people even more sick. The TAC forces the government to spread disease and death among the people of our country and at the same time ruin our economy.

Deadly consequences of Pharma-AIDS-fraud:

The South African people pay the price of the pharmaceutical business with AIDS with their lives. The pharmaceutical industry's business in our country depends on the continuation of the AIDS epidemic.

Pharma-Fraud with HIV/AIDS:

The TAC promotes AIDS drugs such as AZT that are extremely toxic and kill people. They damage the immune system, thereby worsening immune deficiency. This is why many people taking AZT get sick with tuberculosis and other infectious diseases.

Did you know that the TAC pays its demonstrators and give them a free T-shirt to march against our government on behalf of foreign pharmaceutical multinationals and their multibillion-dollar business with HIV/AIDS ?
